emPower™ Suite of Services

Lights

With Alarm.com you can remotely turn your lights on or off, have them come on automatically when you walk in the door or set a schedule to make it look like someone is home even when you're not.

Locks

With Alarm.com, you can check in to make sure the doors are locked and even lock the front door from your mobile device if you forgot. Alarm.com keeps your home more secure and lets you track everyone who comes and goes.

Thermostats

Remotely adjust your thermostat via the Web or Alarm.com's free mobile app and set automatic thermostat schedules so you save money.

Extreme Temps

When extremely hot or cold weather rolls through, have your security system automatically adjust the temperature to help you stay comfortable and reduce energy waste.

Smart Schedules

Your Alarm.com powered system learns your home's unique activity patterns and makes specific recommendations to help maximize your energy savings.

Protection. Awareness. Peace of Mind.

- ✓ Interactive Home Security
- ✓ Dedicated Wireless System Monitoring
- ✓ Mobile Apps for Smartphones and Tablets
- ✓ Energy-Saving Smart Schedules
- ✓ Remote Light, Lock and Thermostat Control
- ✓ Automated Extreme Temperature Management

It's all connected

One of the key benefits of using energy management and home automation services from Alarm.com is the integration with your security system.

The connection between your energy management tools and your Alarm.com powered security system allows you to automatically adjust your lights and thermostats in addition to scheduling your lights to turn on or off based on alarm, arming, or sensor activity triggers.
