Video Surveillance Solutions for Homes

Peace of mind at home, even when you can't be there. That's what our video surveillance solution offers. Want to check in on your kids after school? Want to look in on elderly parents? Maybe a pet? Or second home?

At Vector Security[®] we'll design and install a video surveillance solution to fit your lifestyle and budget.

With video cameras in your home, you can:

- Check in no matter where you are. **View live video** or recorded clips from your computer or smartphone. Even watch video from multiple cameras simultaneously.
- Use your computer or smartphone to **remotely control your cameras**. Turn them on and off and adjust views.
- **Enable motion-triggered settings** and receive email or text message alerts when video is recorded so you can see the kids arriving home from school or visitors knocking on your door. If anything is amiss, you'll know right away.
- **Monitor video** of your property with cameras installed in your home. Watch live video or recorded clips, set up motion-triggered recordings, get real-time alerts.
- **Access archived clips** on a secure site to prevent tampering or accidental deletion so you can refer back at any time.

Stay connected with video solutions from Vector Security.
