

Helpful Hints to Keep Your Home Safe

At Vector Security®, your safety is our top priority. Yes, we can help protect your home with a range of intelligent security solutions to fit your lifestyle and budget. Sometimes, though, your security can be enhanced by small adjustments within your control.

- Make your home look occupied, even when you're not there.
- Lock all outside doors and windows before you leave the house, even if it's for a short period of time, and before you go to bed. Vector Security has security solutions that allow you to control your locks remotely using a computer or smartphone.
- Leave lights on when you go out. Our energy management solutions let you turn lights on and off remotely, so if you're gone for longer than you expected, you can control your lights from wherever you are.
- Keep your garage door closed and locked.
- Don't let mail build up while you are away. Have the Post Office hold your mail, or arrange for a friend or neighbor to remove it regularly.
- Arrange for your lawn to be mowed if you're away for an extended time.
- Check door and window locks and replace them with secure devices as necessary.
- Install deadbolt locks on all outside doors.
- Install special locks for sliding glass doors, as they are especially vulnerable to break-ins.

Targeting the Outside

- Have adequate exterior lighting so there are no dark places for intruders to hide. Motion-sensitive lights or floodlights are good solutions.
- Trim trees and shrubs so that they cannot be used as hiding places.
- Make sure your door hinges are on the inside of the house.
- Turn on outdoor lights in the evening, whether someone is at home or not.
