Access Control for Businesses

From basic intercom systems to solutions that control virtually every access point within a facility, access control services from Vector Security[®] give your employees convenient entry to their workplace while protecting your business from property and information theft.

Our swipe cards, proximity readers, turnstiles and biometric technologies can:

- Improve your company's **operating efficiencies.**
- End the need to **replace lost keys** or make multiple sets of keys.
- Incorporate **time and attendance** features to streamline administrative processes.
- **Integrate with video surveillance** to record events triggered by specific access credentials.
- Control who has access to restricted areas of your property with **customized credentialing.**

See how access control can offer your business a new level of convenience and safety.
