Burglar Alarm Solutions for Businesses

Vector Security[®] can help you protect your business with quality, reliable burglar alarms from some of the best security equipment manufacturers in the industry. Our experts design and install a cost-effective solution that complies with your local jurisdiction codes and insurance requirements.

Should a break-in occur, the system triggers audible and visual alarms to ward off intruders. And unlike "local" alarms that stop there, our alarms send an emergency signal to our Monitoring Center, where operators are available 24/7 to dispatch authorities.

Our alarms feature:

- **User-friendly control panels** that are easy to operate.
- **Wireless keypads and keychains** so you can control your alarm system from anywhere inside or near your business.
- **Motion sensors, door/window contacts and glassbreak detectors** that trigger audible and visual alarms to warn intruders.
- **Mobile solutions** that let you arm and disarm your system and get notifications on your computer or smartphone.
- **Award-winning monitoring** service so authorities are notified quickly in the event of a break-in.

Rest assured your business is safe with cost-effective, responsive security solutions from Vector Security.

How our burglar alarms protect your business:

1. Motion detectors and sensors trigger audible and visual alarms as soon as a break-in occurs.
2. An emergency signal is sent to our Monitoring Center.
3. A station operator verifies the alarm and dispatches help immediately.
