## Burglar Alarm Solutions for Homes

Vector Security<sup>®</sup> can protect your home with quality, reliable burglar alarms from some of the best security equipment manufacturers in the industry. Our experts design and install your alarm system to maximize your protection while meeting your lifestyle and budget needs.

Should a break-in occur, the system sounds an audible alarm to ward off intruders. And unlike “local” alarms that stop there, our alarms send an emergency signal to our Monitoring Center, where operators are available 24/7 to dispatch help to your home.

### Our alarms feature:

- **Easy-to-use control panels** that everyone in your household can operate.
- **Wireless keypads and keychains** so you can control your alarm system from anywhere inside or near your house.
- **Motion sensors, door/window contacts and glassbreak detectors** that trigger an audible alarm to warn intruders.
- **Mobile solutions** that let you arm and disarm your system and get notifications on your computer or smartphone.
- **Award-winning monitoring** service so authorities are notified quickly in the event of a break-in.

**Rest assured your home is safe with security solutions tailored just for you.**

### How our burglar alarms protect you:

1. Motion detectors and sensors trigger an audible alarm as soon as a break-in occurs, alerting occupants and intruders.
2. An emergency signal is sent to our Monitoring Center.
3. A station operator calls you to verify the alarm.
4. If the alarm is real, the operator dispatches help immediately.
